

The modern alternative to a pylon system.

DisplayShift² Wings 55-78

Kindermann's DisplayShift²-series includes three models of mechanically height-adjustable display mounts: Two classic and an education model including side wings, which have been specially designed for the education sector.

The DisplayShift² Wings is a wall-mounted, mechanically height-adjustable display mount with panel wings. The system is suitable for interactive screens with a size of up to 86 inches (218 cm screen diagonal) and a weight of 55 – 78 kg.

The side wings can be printed individually.

Special features

The Kindermann DisplayShift² Wings was developed with the support of our education experts and is therefore ideally tailored to the educational sector.

Successful endurance tests of the product with over 50,000 cycles as well as a corresponding TÜV-certification* according to DIN EN 14434 guarantee the highest safety standards.

Quick and easy installation, long term use without maintenance and power-free application saves you money.

The DisplayShift² Wings EDU model can be manually adjusted to any height in an instant, providing users of any size with an optimal ergonomic work environment for using interactive touch displays

DisplayShift² stands for product availability: Fast delivery times, 5-year warranty with advance replacement and 10-year spare parts supply on our own products.
