HD PROGRESSIVE

No borders for a full vision
available with HD Progressive for high resolution projection

FullVision - No borders for an inconspicuous installation

Projecta's FullVision is a new wrap-around projection screen that can be used with the latest projector technology. The FullVision's borderless and low-profile fixed frame projection screen enables the entire surface to be used for projection. The FullVision is available with HD Progressive surfaces, the latest technology in projection surfaces designed for 4K and Ultra HD to maximize the technology of your projector.

The surface of this screen wraps around the aluminum frame and attaches to the rear. The FullVision is available in custom sizes up to 400 cm height and 600 cm width, and all projection surfaces are seamless. The FullVision is a great choice for any space where the screen should blend into the room design when not in use, but should deliver the very best in projection when the projector turns on.
