

**Klick&Show**

K-FleX

Kindermann Klick&Show K-FleX - The flexible solution for advanced wireless collaboration. Designed to grow with your needs for modern working environments.

- > **Universal**, cross-platform wireless solution for BYOD presentations and (as an option) for BYOM conferencing
- > **BYOD** - Present wirelessly via transmitter, apps for Windows, MacOS, Android or via AirPlay, Miracast and Google Cast
- > **BYOM** - Wireless conferencing with brilliant HQ camera resolution up to 1080p@30Hz
The BYOM license key (7488000366) can flexibly be upgraded at the time of purchase or later
- > **Best picture quality** via HDMI output in 4K60 resolution
- > **Split-Screen function** for simultaneous presentation of up to 4 participants on the main display
- > **Dual-Desktop function** for simultaneous streaming of primary and extended desktop in BYOM meetings
- > **Reverse mirroring of the main display** to share local content with remote participants in a BYOM call
- > **4K HDMI input** for sharing content from wired HDMI sources
- > **2 types of Klick&Show 4K transmitters** are available to choose from: HDMI and USB-C
- > **Add more transmitters** to include more participants in the meeting and to increase device compatibility
- > **Full enterprise network integration** possible, with total control for administrators via the built-in web interface or the free ManageTool
- > **Intuitive-to-use** and secure

Klick&Show K-FleX is the next generation of expandable wireless collaboration systems for universal use in meeting rooms, huddle spaces and classrooms. The K-FleX core version already comes with a versatile set of functions for users to present audiovisual content from laptops or mobile devices in a truly simple way (BYOD) - with no cables, no hassle, and no wasted time.

The optional Klick&Show BYOM License Key further transforms K-FleX into a comprehensive BYOM wireless conferencing system - turning traditional meeting rooms into conference rooms for hybrid meetings between the office and remote participants. This allows K-FleX to wirelessly connect laptops to the main display and to existing USB devices in the room, such as video- or soundbars, cameras and speakerphones for both, wireless local presentations (BYOD) and online meetings (BYOM) via your preferred UCC platform (Microsoft Teams, Zoom, Cisco WebEx, Google Meet, etc.).

What's more, K-FleX lets you receive a mirrored live view of the entire main display for sharing collaborative local content with remote participants in a BYOM call. Content from wired HDMI sources, such as a stationary PC or a document camera, can be presented via the integrated 4K-compatible HDMI input.

Complete your Klick&Show system with the matching Klick&Show 4K WiFi transmitters. Simply connect a transmitter to your device and click the Show button to mirror live content to the main screen. Keep your meeting table perfectly organized with the TRAY-4K in a matching design.

Laptop users without transmitter simply launch the Klick&Show client app for Windows or MacOS to mirror 4K content to the main screen. Content from mobile phones and tablets can be shared just as easily via AirPlay, Miracast, Google Cast or via the free Android app.

With this next-generation Klick&Show device, you can also benefit from the innovative Dual-Desktop function in BYOM meetings and combine the Klick&Show transmitter and app to simultaneously transmit two different desktop contents of the same laptop to the main display.
