III. Operation Guide

Connection Method

① LAN Connection

- The Touch Control Panel and the host are connected to the same local area network, and the Touch Control Panel can be connected to the network through RJ45 IN.
- Select a wired connection on the Touch Control Panel to search for a host that can be connected, and click to connect.

② Wireless Connection

- Connect to the hotspot of the Interactive Flat Panel (make sure the hotspot of the Interactive Flat Panel is turned on, you can check it in "Settings-Wireless Hotspot" of the Interactive Flat Panel)
- Select wireless connection on the Touch Control Panel, and enter the hotspot password of the Interactive Flat Panel to connect successfully.

Note: This device can support adapter and PoE power supply, and PoE power supply can only be used when DC is connected.

Note: The host terminal needs to be adapted in advance with the Touch Control Panel to realize the connection.

The connection diagram is as follows:

Instructions

① Meetings

All meeting schedules are displayed here. You can launch a meeting with one click.

② Host Device Apps

Select the application on the host device to display and click to launch.

③ Screen Sync

Synchronize the screen and control all operations on the host.

④ Settings
